ELMO CCD CAMERAS FOR INDUSTRIAL APPLICATIONS

MN400

- ϕ 17mm One-Piece Micro Camera. No CCU required.
- Color with 410,000 pixels 1/2" CCD
- 3m/10', 10m/33' camera cables and a variety of ϕ 17mm lenses as optional
- 480TV lines(H) high resolution

UN43H

- ϕ 12mm Ultra-Micro camera. Camera head weighs only 0.6 oz (18grm)
- Color with 410,000 pixels 1/3" CCD
- Max. 30m/98' camera cables and a variety of ϕ 12mm lenses as optional
(To be used with optional CCU, CC431E)

MN43H

- ϕ 17mm Micro camera. Camera head weighs only 0.6 oz (18grm)
- Color with 410,000 pixels 1/2" CCD
- Max. 54m/177' camera cables and a variety of ϕ 17mm lenses as optional
(To be used with optional CCU, CC431E)

**ME421E
ME421R**

- ϕ 17mm Micro camera. Camera head weighs only 0.5 oz (16grm)
- Black & White with 410,000 pixels 1/2" CCD
- 570 TV lines (H) high resolution and 1.8 lx high sensitivity
- Full synchronization system including one-pulse trigger mode
- Max. 30m/98' camera cables and a variety of ϕ 17mm lenses as optional
- Model ME421R has no I/R cut filter for special application.
(Camera head and CCU are supplied as a set.)

CN43H

- 1 1/4 x 1 1/2 x 15/16" (32x38x33.8mm) in size, 2.8 oz (80 grm) compact camera head
- Color with 410,000 pixels 1/2" CCD
- Accepts C-mount lenses
- Max. 54m/177' camera cables as optional
(To be used with Optional CCU, CC431E)

* Scale 1:1

* Lens and cable are optional.

Camera Control Unit (CCU) : CC431E

ON SCREEN DISPLAY

Setting while monitoring the menu on the monitor screen is possible.

[Main Menu]

AREA (Measurement Area)

AREA is a measurement AREA item for AGC, auto electronic shutter and white balance.

The size of AREA is approximately as shown below.

AGC (Automatic Gain Control)

AGC functions "OFF", "ON" or "UP" can be selected on the screen menu. Generally, the camera is used with the AGC set to OFF, but when increased sensitivity is required, it is set to ON. When more sensitivity is required, "UP" is selected. We recommend you increase intensity of the lighting to obtain good pictures. The AGC measurement area is the same as that used for "AREA(Measurement Area)."

OFF : 0dB
ON : Max + 6dB
UP : Max + 12dB

SHUTTER(Electronic Shutter, Backlight Control)

The electronic shutter is available in AUTO (auto electronic shutter), 1/60 ~ 1/10000 and SS (Synchronized Scan).

AUTO

Controls electronic shutter automatically to get the set video level. Can be selected in backlight correction, peak measurement, average measurement and measurement area.

●Detailed setting in AUTO mode (Auto Electronic Shutter)

LEVEL	Adjust the auto electronic shutter video level.
BLC	Correction for backlight. This can be set when the measurement area is set to one of 1/2, 1/8 and SLIT for AREA in the main menu. Backlight is corrected at ON, but not at OFF.
PEAK:AVE	Selects peak or average for measurement of auto electronic shutter video level.

1/60 ~ 1/10000

Exposure time can be fixed to any one of 1/60, 1/100, 1/250, 1/500, 1/1000, 1/2000, 1/4000 and 1/10000.

SS (Synchronized Scan)

Sets the electronic shutter in horizontal scanning time (1H).

WHITE BALANCE

White balance adjustment is necessary to obtain pictures with correct color tone. This camera allows you to select the white balance adjustment of AUTO, SET and MANU.

AUTO

Camera automatically measures object color temperature and adjusts the white balance.

SET

Adjust white balance by pressing UP button on the camera control unit while shooting a white object.

FILE (Screen File)

There are two scene files A and B which can be selected according to the shooting state.

43H Series Color Camera Heads : UN43H/MN43H/CN43H

Equipped a new 410,000 pixels CCD and a DSP (Digital Signal Processor), the ELMO MICRO CAMERA 43H series have achieved very high sensitivity.

New functions, like "Measurement Area Selection", clearer image quality and higher cost performance are also the advantages.

UN43H

MN43H

CN43H

CAMERA SPECIFICATIONS (Quick Reference Table)

* See the independent product catalogs or contact ELMO/ELMO dealers for detailed specifications.

* Design and specifications are subject to change without notice.

Camera Model	UN43H	MN43H	CN43H
Camera control unit (CCU)	Optional (CC431E)	Optional (CC431E)	Optional (CC431E)

Select and connect the camera head to meet your particular needs/location among the world smallest 12mm dia., the best-selling 17mm dia. and the standard C-mount cameras.

DSP (Digital Signal Processing) camera control unit, CC431E (Optional) accepts any of 43H series camera heads. The CC431E features On-Screen Display control and Screen File function to store two menu settings and to recall the specific mode immediately. Selectable measurement area for white balance, AGC and auto electronic shutter settings.
